

ZEXA – BLEACH 4%

BLEACHING & SANITISING AGENT

Description:

Bleach 4% is a stabilised Chlorine agent. Bleach 4% is used in the Dairy, Food and Beverage industries as a sanitising agent in processing equipment. Used in the Landry industry as a stain remover and bleaching agent and water treatment as a sanitising agent. Bleach 4% is excellent for ware washing e.g. For the removal of tannin and bloodstains in the kitchen and destroying fungal growths and moulds in the bar & cellar areas.

Directions for Use:

Laundry: Use 4 -12 mls per kilo of dry weight laundry in wash load.

Sanitizing: Dilute 25 ml Bleach 4% per Lt of water. Apply directly to surface allow 2 to 3 minutes contact time. Discard day old solutions.

1000ppm chlorine solution: Dilute 40ml with water and use to sanitise hard surfaces. Rinse off with water.

Product Type	Bleaching & Sanitising Agent
pH Level	pH 11 – 12
Odour	Slight Chlorine
Appearance	Pale Yellow Green
Suitable	Suitable in food preparation areas

First Aid

Inhalation: Remove the victim from the source of exposure. If the victim is not breathing, apply artificial resuscitation.

Ingestion: Do NOT induce vomiting. Give water to drink. Seek medical attention.

Skin Contact: Irritation is unlikely. If irritation does occur, flush with gently flowing water for 5 minutes or until product is removed. In case of prolonged contact (more than 15 minutes e.g. accidental spillage), remove contaminated clothing and launder before re-use. Rinse product from affected skin until removed.

Eye Contact: Hold the eyes open and flush with water for at least 15 minutes. Seek medical attention

First Aid Facilities: This Safety Data Sheet should be provided to the attending medical doctor. Normal washroom facilities are generally suitable. It is recommended that an eyewash station be available and ready for use. Advice to Doctor: treat symptomatically
