

Engine Coolant

READY TO USE

PRODUCT DESCRIPTION:

Zexa Engine Coolant has been developed for anti-boil, anti-freeze and anti-corrosion protection for petrol and diesel motor cooling systems.

This product has been specially formulated to transfer and optimise the heat in the engine and deploy antifreeze protection in order to it keep running in optimal condition.

When used as directed, this product helps reduce the deposition of sludge on heat exchange surfaces, reducing friction and minimising wear.

DIRECTIONS FOR USE:

Use NEAT (do not dilute).

Drain systems, flush and refill with Zexa Engine Coolant at regular intervals.

PACK SIZE/S:

5L: 2-820-05000 (Ctn 3)

ENGINE COOLANT

FEATURES:

- Anti-Boil
- Anti-Freeze
- Anti-Corrosion
- Engine/boiler protection
- Australian owned & made

BENEFITS:

- Effortless, ready-to-use formulation
- Excellent protection for petrol & diesel motor cooling systems
- Reduces deposition of sludge on heat exchange surfaces
- Prevents wear of rubber and plastic engine parts
- Made to suit Australian conditions, quality & safety requirements
