

Ultra Rinse Aid Plastic

Suitable for plastics, melamine, silicone

PRODUCT DESCRIPTION:

Zexa Ultra Rinse Aid Plastic is a liquid concentrate formulated for all types of automatic feed commercial dishwashers ideal for plastic items.

It is formulated to break the surface tension in the water, enabling excess water to sheet off resulting in a streak-free finish. With the addition of a drying additive to noticeably slash drying time of washed plastic, melamine and silicone products, enhancing finished surface appearance by eliminating streaks and spotting.

Highly economical, for low dosing into machines.

DIRECTIONS FOR USE:

Automatic dispenser systems – Dispense 0.5 to 2mL per 1L of water through automatic dispensing equipment.

Note: Concentration required will vary depending on the type of machine and load weight dilution during the wash cycle program.

Please refer to manufacturer’s recommendations.

Commercial machines – integrated rinse system:

Simply connect feeder tube to the Rinse Aid drum. Ensure dosage settings are set as directed by your supplier for your dispensing system.

Domestic machines:

Simply add Machine Rinse Aid to the rinse aid compartment when needed.

PACK SIZE/S: 5L, 15L

FEATURES:

- Designed for use in automatic dishwashers
- Helps keep rinse lines & jets free from scale
- Ideal for plastic, melamine & silicone based products
- Built in descaler
- Australian made

BENEFITS:

- Ensures wash efficacy & reduces the need for manual drying
- Optimises machine performance
- Ultra fast drying time for ultimate streak-free finish
- Made to suit Australian kitchen conditions, quality & safety requirements
